Inchoative Emotion Verbs in Finnish Maximilian Murmann, 2019-05-27 The volume investigates the syntagmatic relations of certain Finnish emotion verbs that are formed by the derivational suffix -ua/-yä (e.g. suuttua get angry, pelästyä get frightened). Prototypically, the suffix expresses reflexivity, but in the case of the inchoative emotion verbs, it indicates a change of state on behalf of the experiencer, from a non-emotional state to an emotional state. The starting point of the investigation is a discussion of different psychological theories of emotion. The discussion shows that constructivist theories particularly emphasize the role of language and offer several links to the cognitive, usage-based model of language that constitutes the theoretical framework guiding the thesis. With regard to the usage-based model, special focus will be put on argument structures and stimulus nouns. The empirical part makes use of different forms of co-occurrence analysis in order to shed light the syntagmatic relations of the inchoative emotion verbs. Inchoative Emotion Verbs in Finnish won the 2019 Doctoral Dissertation Award of the Society for the Study of Finnish (Kotikielen Seura).

Middle English Verbs of Emotion and Impersonal Constructions Ayumi Miura, 2015 With a careful use of dictionary materials and modern linguistic approaches, this book investigates why some Middle English verbs of emotion are attested in impersonal constructions while others are not, even though they look almost synonymous. A range of factors are identified that affected their behaviour.

The Emotion Thesaurus: A Writer's Guide to Character Expression (2nd Edition) Becca Puglisi, Angela Ackerman, 2019-02-19 The bestselling Emotion Thesaurus, often hailed as “the gold standard for writers” and credited with transforming how writers craft emotion, has now been expanded to include 56 new entries! One of the biggest struggles for writers is how to convey emotion to readers in a unique and compelling way. When showing our characters’ feelings, we often use the first idea that comes to mind, and they end up smiling, nodding, and frowning too much. If you need inspiration for creating characters’ emotional responses that are personalized and evocative, this ultimate show-don’t-tell guide for emotion can help. It includes:

- Body language cues, thoughts, and visceral responses for over 130 emotions that cover a range of intensity from mild to severe, providing innumerable options for individualizing a character’s reactions
- A breakdown of the biggest emotion-related writing problems and how to overcome them
- Advice on what should be done before drafting to make sure your characters’ emotions will be realistic and consistent
- Instruction for how to show hidden

feelings and emotional subtext through dialogue and nonverbal cues • And much more! The Emotion Thesaurus, in its easy-to-navigate list format, will inspire you to create stronger, fresher character expressions and engage readers from your first page to your last.

Verb Valency Patterns Susen Faulhaber, 2011-04-29 Taking as its point of departure the general assumption that meaning is crucial in accounting for verb complementation, this volume presents the results of an empirical study of verb complementation patterns of semantically similar English verbs. The semantic parallels of the verbs selected are based on their coverage in dictionaries - first and foremost the Valency Dictionary of English (Herbst, Heath, Roe and Götz 2004) - as well as corpus research and native speaker assessments. It is demonstrated that despite obvious similarities in complementation between such verbs, there are still a significant number of syntactic discrepancies which cannot be accounted for on the basis of meaning alone and that semantic factors - such as selection restrictions and aspectual properties - do not sufficiently correlate with the verbs' syntactic properties and consequently do not have sufficient explanatory power. Thus the results rigorously challenge so-called projectionist approaches which assume the position that complementation is determined by semantic properties and thus ought to be predictable on this basis. In the light of a general trend towards placing greater emphasis on semantic aspects, in the fields of construction grammar and cognitive grammar too, the number of idiosyncratic phenomena on the level of single complements as well as whole patterns clearly underlines the importance of storage phenomena as opposed to rule-based generation. As such it stresses the necessity of finding ways to systematically account for item-specific properties of verbs in any grammatical theory of the English language. The book is targeted at all linguists interested in the relationship between semantics and syntax, which is one of the prevalent questions in modern linguistics, also in the field of construction grammar and cognitive grammar. Since the data is presented in a way which is compatible with various theories of complementation, the target group is clearly not restricted to any specific linguistic school. Because of the large amount of item-specific information presented, this book is also a valuable source for grammarians and lexicographers.

Verb Second Horst Lohnstein, Antonios Tsiknakis, 2020-03-09 This book addresses a general phenomenon in the European languages: verb second. The articles provide a comprehensive survey of synchronic vs. diachronic developments in the Germanic and Romance languages. New theoretical insights into the interaction of the properties of verbal mood and syntactic structure building lead to hypotheses about the mutual influence of these systems. The diachronic change in the syntax together with changes in the inflectional system show the interdependence between the syntactic and the inflectional component. The fact that the subjunctive can license verb second in dependent clauses reveals further dependencies between these subsystems of grammar. Fronting finiteness furthermore constitutes an instance of a main clause phenomenon. Whether assertion or at-issueness are encoded through this grammatical process will be a matter in the

debates discussed in the book. Moreover, information structure appears to be directly related to the fronting of other constituents in front of the finite verb. Questions concerning the interrelations between these various subcomponents of the grammatical system are investigated.

The Middle Voice and Connected Constructions in Ibero-Romance Carlota de Benito Moreno, 2022-08-15 The reflexive constructions that are the focus of this book are the constructions broadly described with the term “middle”: i.e., those that can appear in all persons, and in which the reflexive marker (RM) cannot be understood as a full referential pronoun. One goal of this study is to provide a corpus-based typology of middle and related uses that allow us to compare the behaviour of the RM in these constructions with previous typological accounts, where competing models (based either on changes of diathesis or on the semantics of the verbal event) can be found. A second goal is to shed light on the evolution of the different functions of the RM, by exploring the factors that affect its productivity, with a specific focus on those verbs where reflexive marking is most variable, that is, anticausative verbs and verbs with no change of valency. These reflexive constructions show a notable difference in productivity in Spanish and Galician, although the languages are closely related and contiguous. The languages are thus good candidates for a contrastive and variationist analysis serving these two goals. The semantic class of the predicate, its aspectual properties and the animacy of the subject are some of the most relevant factors that are taken into account to understand the motivations behind the presence (or absence) of the RM. By relying on a corpus of interviews from rural communities across peninsular Spain (except Catalonia), space as a relevant extra-linguistic variable is taken into account, helping uncover previously unknown geographical patterns.

Language and Cognitive Structures of Emotion Prakash Mondal,2016-09-13 This book examines linguistic expressions of emotion in intensional contexts and offers a formally elegant account of the relationship between language and emotion. The author presents a compelling case for the view that there exist, contrary to popular belief, logical universals at the intersection of language and emotive content. This book shows that emotive structures in the mind that are widely assumed to be not only subjectively or socio-culturally variable but also irrelevant to a general theory of cognition offer an unusually suitable ground for a formal theory of emotive representations, allowing for surprising logical and cognitive consequences for a theory of cognition. Challenging mainstream assumptions in cognitive science and in linguistics, this book will appeal to linguists, philosophers of the mind, linguistic anthropologists, psychologists and cognitive scientists of all persuasions.

Conceptual Structure in Lexical Items Kristel Proost,2007 This volume deals with the occurrence of lexical gaps in the domain of linguistic action verbs. Though these constitute a considerable proportion of the verb inventory of many languages, not all concepts of verbal communication may be expressed by lexical items in any particular one of them. Introducing a conceptual system which allows gaps to be searched for systematically, this study shows which concepts of verbal communication are and which are not lexicalised in English, German and Dutch. The lexicalisation patterns observed shed light on the way in which verbal behaviour is conceptualised in a particular speech community. To complete the picture, the volume also addresses the question of whether communication concepts which may not be expressed by verbs may be lexicalised by fixed multiword expressions.

Tense, Mood and Aspect Louis de Saussure,Jacques Moeschler,Genoveva Puskás,2007 This book is a collection of articles dealing with theoretical issues in the study of tense, mood and aspect, as well as with specific semantic and syntactic problems raised by linguistic expressions dedicated to these domains across a variety of languages. Through these papers, strong variations are explored, but also crosslinguistic convergences are investigated. Numerous phenomena so far often left aside in linguistics are described and enlightened by different scientific standpoints, which they serve to illustrate. The languages investigated in this volume include Germanic languages (Dutch, English, German), Romance (French, Catalan, Italian), Slavic (Serbo-Croatian, Czech, Russian), Greek, and non-indoeuropean languages such as Thai, Digo and Kikuyu. Related topics such as grammaticalization, presuppositions, questions in dialogue, illocutionary acts and acquisition are incidentally called upon in order to shed light from the outside onto tense, mood (and modality) and aspect. This volume is of great interest for all scholars engaged in contemporary research on the linguistic expression of tense, mood and aspect. The papers gathered in this volume are a tight selection of the ones that were presented at the 6th Chronos colloquium.

Complementizer Semantics in European Languages Kasper Boye,Petar Kehayov,2016-07-11 Complementizers may be defined as conjunctions that have the function of identifying clauses as complements. In recent years, it has become increasingly clear that they have additional functions. Some of these functions are semantic in the sense that they represent conventional contributions to the meanings of the complements. The present book puts a focus to these semantic complementizer functions.

Philosophical Insights into Pragmatics Piotr Stalmaszczyk,2019-05-20 The book provides philosophical interpretations of pragmatic issues. It concentrates on well-established concepts such as presupposition, entailment,

implicature, speech acts, subsentential speech acts, different cases of meaning as use, expressive meanings and expressive commitments, as well as the relation between knowledge and belief. The discussion goes beyond linguistic investigations and offers a wide philosophical perspective.

Current Approaches to Metaphor Analysis in Discourse Ignasi Navarro i Ferrando,2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification, analysis and interpretation of metaphor across communication channels, situational contexts, genres and social spheres. It reflects three foremost trends of present metaphor research, namely the communicative approach, the cognitive modelling approach and the multimodality approach. These trends are considered as areas of research emerging on the ground of the Conceptual Metaphor Theory, initiated by Lakoff. The book intends to show their concomitances as well as mark their diversifying paths. The aim is to bring about and make apparent the many connections among assumingly different trends stemming from CMT. Whereas discrepancies between communicative and conceptual perspectives might seem irredeemable, the book emphasizes and claims that the background framework of CMT provides a solid foundation for collaboration and mutual influence. Consequently, the analysis of metaphor usage in context may provide insights for cognitive modelling proposals. The analysis of cognitive configuration of conceptual domains may, in turn, illuminate our understanding of communicative decisions in discourse. The integration of multimodal metaphor analysis puts forward the idea that diverse modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances. The various subject areas and methodologies illuminate the scene of current research in the field. The poignant contributions open far reaching avenues into the realm of human thought and discourse.
