The Refracted Muse Enrique García Santo-Tomás,2017-08-08 Galileo never set foot on the Iberian Peninsula, yet, as Enrique García Santo-Tomás unfolds in *The Refracted Muse*, the news of his work with telescopes brought him to surprising prominence—not just among Spaniards working in the developing science of optometry but among creative writers as well. While Spain is often thought to have taken little notice of the Scientific Revolution, García Santo-Tomás tells a different story, one that reveals Golden Age Spanish literature to be in close dialogue with the New Science. Drawing on the work of writers such as Cervantes, Lope de Vega, Calderón de la Barca, and Quevedo, he helps us trace the influence of science and discovery on the rapidly developing and highly playful genre of the novel. Indeed, García Santo-Tomás makes a strong case that the rise of the novel cannot be fully understood without taking into account its relationship to the scientific discoveries of the period.

Language, Identity and Symbolic Culture David Evans,2018-05-31 Language is integral to the construction of personal, socio-cultural and socio-political identities. *Language, Identity and Symbolic Culture* closely investigates the relationship between language and identities, offering a comprehensive yet progressive view of how linguistics relates to development and education, both in theoretical and real world applications. Progressing from a theoretical core examining the connection between language and individual identity, this book moves on to look at the wider socio-political discourse

involving the marginalization and resistance of communities in the world. Beginning with the philosophical paradigms of language, Evans questions whether language shapes personal identities in its daily use or whether language is simply a tool for describing, rather than creating, the world. Extrapolating on this, the contributors utilise case studies from across the globe to see how these linguistic perspectives are played out in the real world, considering the role of language in issues surrounding power, colonization, marginalization and education. Language, Identity and Symbolic Culture offers a view of language identity conflicts around the world and an understanding of the opportunities of political and cultural emancipation created through language and open discourse.

Ecological Modernisation Around the World Arthur P.J. Mol, David A. Sonnenfeld, 2014-04-08 The idea of ecological modernisation originated in Western Europe in the 1980s, gaining attention around the world by the late 1990s. At the core of this social scientific and policy-oriented approach is the view that contemporary societies have the capability of dealing with their environmental crises. Experiences in some countries demonstrate that modern institutions can incorporate environmental interests into their daily routines. Elsewhere, economic and political interests dominate development trajectories and environmental deterioration continues, challenging the premises of ecological modernisation. This volume brings together research on ecological modernisation practices around the world. Studies on Western, Central, and Eastern Europe, the USA, and Southeast Asia examine the applicability of this approach to advanced industrial countries, transitional economies and developing countries respectively. Authors critically examine the premises of ecological modernisation theory, assess its value for understanding past and present environmental transformations, and outline paths for designing future sustainable development. Taken together, the studies in collected this volume offer significant refinements, extensions and critiques of ecological modernisation theory and suggest important directions for future research on social and policy dimensions of environmental change.

Mental Magic William Walker William Walker Atkinson, 2015-03-20 From the word Magi came the term Magic, which Webster has defined as follows: The hidden wisdom supposed to be possessed by the Magi; relating to the occult powers of nature; mastery of secret forces in nature; having extraordinary properties; seemingly requiring more than human power, etc. So we may consider the word magic to mean: mastery of the occult forces of nature, the term indicating the existence of such forces, and the possibility of the mastery or control of them. And in ancient times, magic was always believed to be connected in some way with the use of the mind, particularly in its aspects of will, desire, and imagination. Effects were believed to result because some magician either willed it; desired it to be; or else imagined it would occur;-in each case the result happening as a materialization of the mental conception or wish. Wishing was always believed to be a magical operation, and if we examine a wish we see it is composed of the use of the imagination, coupled with desire, and backed up with will.

From Darwin to Behaviourism Robert Boakes,1984-04-19 This volume surveys the way that understanding of the minds of animals and ideas about the relationship between animal and human behaviour developed from around 1870 to 1930. In describing the research and theories which contributed to these developments, this book looks at the people who undertook such studies and the reasons why they did so. Its main purpose is to examine the different ways in which the outcome of this work affected their ideas about the human mind and exerted such a formative influence on psychology in general. This book will be used by first and second year undergraduates studying psychology, and will also appeal to students of the history of science and philosophy. In addition, the lucid, non-technical style of this book will provide an excellent introduction to the general reader who would like to know more about this interesting subject.

Urban Ethnicity Abner Cohen,2014-05-01 Tavistock Press was established as a co-operative venture between the Tavistock Institute and Routledge & Kegan Paul (RKP) in the 1950s to produce a series of major contributions across the social sciences. This volume is part of a 2001 reissue of a selection of those important works which have since gone out of print, or are difficult to locate. Published by Routledge, 112 volumes in total are being brought together under the name The International Behavioural and Social Sciences Library: Classics from the Tavistock Press. Reproduced here in facsimile, this volume was originally published in 1974 and is available individually. The collection is also available in a number of themed mini-sets of between 5 and 13 volumes, or as a complete collection.

The Crisis of Public Health Pan American Health Organization,1992 The crisis of public health: Reflections for the debate brings together an important and informative group of papers relating to the process of analysis that PAHO has fostered for the last four years. The book first looks at the programmatic priorities established by PAHO's Governing Bodies relative to this issue and then presents representative points of view from throughout the hemisphere on what constitutes the crisis as such. These latter contributions were also the object of an initial discussion held in New Orleans, Louisiana, in October 1991, which is summarized in the third part of the book. Finally, a proposed agenda for future debate at the country level is presented. The principal objective of The crisis of public health: Reflections for the debate is to stimulate public health professionals to undertake a more thorough analysis, with the hope of effecting a change in both what is examined (broaden the object of analysis) and how it is examined (use more far-reaching analytical traditions.) Readers will realize that the book is not merely a culmination of current concern over public health but rather a point of departure for further analysis and action.

The Ancient Egyptians and the Origin of Civilization G. Elliot Smith,2022-04-04 2022 Reprint of the 1923 Illustrated Edition. Exact facsimile of the original edition and not reproduced with Optical Recognition Software. Dr. Smith deals only

with the most ancient, that is, the earliest Egyptians, and he traces their influence not only upon the civilization of Europe, but also, and in the first place, upon that of northern Africa and western Asia. To read him on this subject is indeed to be enlightened, and every historian must read with attention the remarkable conclusions to which he has been led by his experience in the dissection of mummies (gained in the course of his medical work at Cairo) in connection with the scientific archeological work of Dr. Reisner and his assistants in Lower Nubia. This monograph, in its second, hard-to-locate edition, proposes a connection between prehistoric monumental European sites and those of the Pyramid Age in Egypt. Using ethnicity as a basis, Smith ties the ancient peoples of Egypt to those of Syria and discusses how Egyptian culture spread from its point of origin. It is to Smith's ...lasting credit that he, first with an intuition transcending mere anatomy, perceived in Egypt the essential threads of primitive culture and civilization and out of them wove, on the loom of his genius, the tapestry of human history. Obituary, *The British Medical Journal*: Vol. 1, No. 3967 (Jan. 16, 1937), p. 149

Civilizing American Cities Frederick Law Olmsted, 1979 A century ago Frederick Law Olmsted recognized the need for extensive planning if American cities were to become civilized environments for man. The selections in this book demonstrate his understanding of urban spaces and how, when politically unobstructed, he was able to manipulate them. While Sutton has concentrated on Olmsted's contributions to the theory and practice of city planning, her anthology reveals a broad and comprehensive cross section of his career. Writings in the first two chapters elucidate the views and values that Olmsted brought to his work--notably his attitudes on form and function (fitness and appropriateness)-- and his criticisms of existing urban patterns. At a time when men generally took a static approach to planning, Olmsted opposed the traditional grid system, lack of organic structure, and abuse of space which dominated schemes for American cities. Instead he proposed that large spaces be set aside for public parks, connected by roadways and public transportation to the rest of the city. The books remaining chapters contain documents written in support of specific plans for five North American cities with widely varying conditions: San Francisco, Buffalo, Montreal, Chicago, and Boston. The writings range in scope from Olmsted's observations on nineteenth century California life to his most elaborate and ambitious design of a system of parks and boulevards for Boston. Two selections describing plans for the exurban Garden Cities of Berkeley, California, and Riverside, Illinois, complete anthology. At the end of his career, Olmsted could look on 17 large public parks as well as numerous smaller works and comment: I know that in the minds of a large body of men of influence I have raised my calling from the rank of a trade, even of a handicraft, to that of a liberal profession, an art, an art of design.

The Life and Letters of George John Romanes ... George John Romanes, Ethel Duncan Romanes, 1896

Theories of Race and Ethnic Relations John Rex, David Mason, 1986 This book brings together internationally known scholars from a wide range of disciplines and theoretical traditions, all of whom have made significant contributions to the field of race and ethnic relations. As well as identifying important and persistent points of controversy, the collection reveals

a complementary and multifaceted approach to theorisation. The theories represented include contributions from the perspective of sociology. These range from the established perspectives of Marx and Weber through to the more recent interventions of rational choice theory, symbolic interactionism and identity structure analysis.

The No-Growth Society Mancur Olsen, Hans H. Landsberg, 2013-08-21 First Published in 1975. Two policy proposals are particularly notable and owe nothing to the long-standing controversies between left and right. Rather, they suggest new perceptions of reality and a changing sense of values. They are thoroughly radical and indeed subversive since they attack two fundamental features of modern society: its tendency to exponential growth and its assumption of continuous progress. The two proposals are zero economic growth and zero population growth... Quite apart from the question of the desirability of a no-growth society, or even the possibility that it may even be a necessity, what properties should it have? How would its social, political and economic systems function? What would people be like in such a society? What sort of culture or 'consciousness' would be appropriate in it? ...A careful examination of the no-growth proposals helps to reveal a number of the most fundamental failings and fears of modern life.
