*Embedded Mechatronic Systems* Abdelkhalak El Hami,Philippe Pougnet,2019-11-15 Mechatronics brings together computer science, mechanics and electronics. It enables us to improve the performances of embedded electronic systems by reducing their weight, volume, energy consumption and cost. Mechatronic equipment must operate without failure throughout ever-increasing service lives. The particularly severe conditions of use of embedded mechatronics cause failure mechanisms which are the source of breakdowns. Until now, these failure phenomena have not been looked at with enough depth to be able to be controlled.

*Event Management and Sustainability* Razaq Raj,James Musgrave,2009 Sustainable management is an important consideration for businesses and organisations, and the enormous number of tourism events taking place requiring facilities, power, transport, people and much more makes sustainable event planning a considerable priority. By looking at mega events, sports events, conferences and festivals, this book uses best practice case studies to illustrate sustainable management issues and practical considerations that managers need to apply, providing an essential reference for researchers and students in leisure and tourism.

**Design Methods and Practices for Research of Project Management** Beverly Pasion,Rodney Turner,2024-05-23 Design Methods and Practices for Research of Project Management is the most comprehensive guide on how to do research on and in project management. Project management as a discipline has experienced near-exponential growth in its application across the business and not-for-profit sectors. This second edition of the authoritative reference book offers a substantial update on the first edition with over 60% new content and so provides both practitioner and student researchers with a fully up-to-date and complete guide to research practice on project management. In Design Methods and Practices for Research of Project Management, Beverly Pasion and Rodney Turner have brought together 26 original chapters from many of the leading international thinkers in project management research. The collection looks at each step in the research stages, including research strategy, management, methodology (quantitative and qualitative), and techniques as well as how to share and publish research findings. The chapters offer an international perspective with examples from a wide range of

project management applications; engineering, construction, megaprojects, high-risk environments, and social transformation. Each chapter includes tips and exercises for the research student, as well as a complete set of further references. The book is the go-to text for practitioners undertaking research in companies, and also doctoral and master's students and their supervisors who are involved in research projects in and for universities.

**The Information Systems Academic Discipline in Australia** Guy G. Gable, Shirley Gregor, Roger Clarke, Gail Ridley, Robert Smyth, 2008-09-01 This book represents the second phase of a multi-method, multi-study of the 'Information Systems Academic Discipline in Australia'. Drawing on Whitley's Theory of Scientific Change, the study analysed the degree of 'professionalisation' of the Information Systems Discipline, the overarching research question being 'To what extent is Information Systems a distinct and mature discipline in Australia?' The book chapters are structured around three main sections: a) the context of the study; b) the state case studies; and c) Australia-wide evidence and analysis. The book is crafted to be accessible to IS and non-IS types both within and outside of Australia. It represents a 'check point'; a snapshot at a point in time. As the first in a hoped for series of such snap-shots, it includes a brief history of IS in Australia, bringing us up to the time of this report. The editorial team comprises Guy Gable, architect and leader; Bob Smyth, project manager; Shirley Gregor, sponsor, host and co-theoretician; Roger Clarke, discipline memory; and Gail Ridley, theoretician. In phase two, the editors undertook to examine each component study, with a view to arriving at an Australia-wide perspective.

Practical cases from several organizations, as well as popular theories such as the Resource-Based Theory and Institutional Theory provide for an insightful yet realistic understanding of OPM as an integrative tool for organizations to improve their efficiency and effectiveness.

**Understanding and Managing Risk Attitude** Dr David Hillson, Ms Ruth Murray-Webster, 2012-03-01 Despite many years of development, risk management remains problematic for the majority of organizations. One common challenge is the human dimension, in other words, the way people perceive risk and risk management. Risk management processes and techniques are operated by people, each of whom is a complex individual, influenced by many different factors. And the

problem is compounded by the fact that most risk management involves people working in groups. This introduces further layers of complexity through relationships and group dynamics. David Hillson's and Ruth Murray-Webster's *Understanding and Managing Risk Attitude* will help you understand the human aspects of risk management and to manage proactively the influence of human behaviour on the risk process. The authors introduce a range of models, perspectives and examples to define and detail the range of possible risk attitudes; looking both at individuals and groups. Using leading-edge thinking on self-awareness and emotional literacy, they develop a powerful approach to address the most common shortfall in current risk management: the failure to manage the human aspects of the process. All this is presented in a practical and applied framework, rather than as a theoretical or academic treatise, based on the authors' shared experiences and expertise, rather than empirical research. Anyone involved in implementing risk management will benefit from this book, including risk practitioners, senior managers and directors responsible for corporate governance, project managers and their teams. It is also essential reading for HR professionals and others interested in organizational or behavioural psychology. This second edition is updated to strengthen the understanding of individual risk attitudes and reinforce what individuals can do to manage those risk attitudes that are leading them away from their objectives. For people who want to embrace this subject, the book highlights ways forward that are proven and practical.

Getting the Right Teachers Into the Right Schools Vimala Ramachandran, Tara Bêteille, Toby Linden, Sangeeta Goyal, 2017-04-24 India's landmark Right of Children to Free and Compulsory Education Act (2009) guarantees education to all children aged 6-14 years. The Act mandates specific student-teacher ratios and emphasizes teacher quality. Writing this into legislation took seven years, but the seven years since has proven that ensuring effective teachers are recruited and placed in all schools in a time-bound manner is considerably more challenging. This report takes a detailed look at the complexity of the teacher management landscape in elementary and secondary schools in nine Indian states. On a daily basis, the administrative machinery of these states has to manage between 19,000 to nearly a million teachers in different types of schools and employment contracts, and cope with recruiting thousands more and distributing them equitably across schools. This report examines the following issues: official requirements for becoming a schoolteacher in India; policies and processes for teacher recruitment, deployment and transfers; salaries and benefits of teachers; professional growth of teachers; and grievance redressal mechanisms for teachers. For the first time in India, this report compares and contrasts stated policy with actual practice in teacher management in the country, using a combination of primary and secondary data. In so doing, the report reveals the hidden challenges and the nature of problems faced by administrators in attempting to build an effective teacher workforce which serves the needs of all of India's 200 million school children. The report examines states with varying characteristics, thus generating knowledge and evidence likely to be of interest to policy makers and practitioners in a wide range of contexts.

*The Future of Management Education* Stéphanie Dameron, Thomas Durand, 2017-01-25 This book discusses the new challenges facing Business Schools around the world with potential scenarios that may be envisioned for 2030 and strategies for stakeholders. Based on documented descriptions of competitive dynamics in the 'business' of business schools in a variety of countries, the authors highlight the fact that the 'industry' of management education is going through major changes such as new governance and business models, mergers and acquisitions, internationalization of faculty and students coexisting with entrenchment in local markets, ever more needs for financial resources, development of distant and blended learning, and increasing pressure for research output to boost rankings. With concerns surrounding the sustainability of current trends in faculty salary inflation, social acceptability of higher fees, cost of distance learning and the risk of an academic-industry divide around knowledge produced by management research, *The Future of Management Education* develops an analysis of business models and institution regulation. The two volumes cover the context of Business Schools in ten countries and grapples with the challenges they currently face. They specifically discuss foresight scenarios and strategic implications for stakeholders (Deans, faculty, students, prospective students, alumni, local businesses, corporations, government, accreditation bodies).

*The Project Manager's Guide to Purchasing* Garth Ward, 2016-02-24 This very practical guide describes the whole process of contracting for goods and services, from selecting tenderers to placing a contract. It details the key topics that are necessary for success, such as contract strategy, contract types, contract law and evaluating tenders. Whilst the book also addresses the project context in which purchasing takes place, the subject matter could equally be applied to any business context. The treatment of the subject assumes no prior knowledge but, at the same time, provides the experienced person with new, and sometimes unconventional, insights into the subject. The book includes personal experiences, cases and exercises in order to root the subject into the real world. *The Project Manager's Guide to Purchasing* has been structured so that the reader can choose the chapter topic areas that they wish to study in isolation. Where necessary references are provided to complement the individual chapters. Illustrations of key documents in the purchasing and contracting process are also provided.

**The Undesirables** Mark Isaacs, 2017-02 When it comes to asylum-seekers on Nauru, we learn only what the government wants us to know. In the wake of *The Nauru Files*, see first-hand is happening inside the Nauru detention centre through Mark Isaacs' eyewitness account. Mark Isaacs worked for the Salvation Army inside the Nauru Detention Centre soon after it re-opened in 2012. He provided humanitarian aid to the men interned in the camp. What he saw there moved him to speak out. *The Undesirables* chronicles his time on Nauru, detailing daily life and the stories of the men held there; the self-harm, suicide attempts, and riots; the rare moments of joy; the moments of deep despair. He takes us behind the gates of Nauru and humanises a political debate usually ruled by misleading rhetoric. This revised edition of *The Undesirables* features an

updated foreword from Julian Burnside and a new chapter by Mark that interrogates how little has changed inside the detention centre, despite documented human rights abuses, and why we need to close offshore detention centres.
