An Elephantasy María Elena Walsh, 2016-08-25 What would you do if you woke up one morning and found a huge and lonely elephant at your door? An elephant with a letter hanging from its ear, saying: My name is Dailan Kifki, and I beg you not to be alarmed at the fact that I'm an elephant...? Well, you would probably adopt him too, wouldn't you? But when Dailan Kifki falls ill and ends up at the top of a tree, only the fire brigade can get him down. Unfortunately, the fireman who arrives seems more interested in flying away with the elephant than bringing him back to earth... And so a charming, surreal and very funny adventure begins, complete with fold-up forests, a grumpy dwarf, an unhelpful brother and a highly suspicious umbrella.

Essential Concepts in Sociology Anthony Giddens, Philip W. Sutton, 2017-05-30 Social life is in a constant process of change, and sociology can never stand still. As a result, sociology today is a theoretically diverse enterprise, covering a huge range of subjects and drawing on a broad array of research methods. Central to this endeavour is the use of core concepts and ideas which allow sociologists to make sense of societies, though our understanding of these concepts necessarily evolves and changes. This clear and jargon-free book introduces a careful selection of essential concepts that have helped to shape sociology and others that continue to do so. Going beyond brief, dictionary-style definitions, Anthony Giddens and Philip W. Sutton provide an extended discussion of each concept which sets it in historical and theoretical context, explores its main meanings in use, introduces relevant criticisms, and points readers to its ongoing development in contemporary research and theorizing. Organized in ten thematic sections, the book offers a portrait of sociology through its essential concepts, ranging from capitalism, identity and deviance to globalization, the environment and intersectionality. It will be

essential reading for all those new to sociology as well as anyone seeking a reliable route map for a rapidly changing world.

Moonlight Seduction Jennifer L. Armentrout, 2018-06-26 The de Vincent brothers are back—and so is the intrigue that surrounds them—in New York Times bestselling author Jennifer L. Armentrout’s sizzling new novel . . . Nicolette Bresson never thought she’d return to the de Vincents’ bayou compound. It’s where her parents work, where Nikki grew up . . . and where she got her heart broken by Gabriel de Vincent himself. Yet here she is, filling in for her sick mother. Avoiding Gabe should be easy, especially when so much of Nikki’s time is spent trying not to be stabbed in the back by the malicious hangers-on who frequent the mansion. But escaping memories of Gabe, much less his smoking-hot presence, is harder than expected—especially since he seems determined to be in Nikki’s space as much as possible. Gabriel spent years beating himself up over his last encounter with Nikki. He’d wanted her then, but for reasons that were bad for both of them. Things have now changed. Gabe sees more than a girl he’s known forever; he sees a smart, talented, and heartbreakingly beautiful woman . . . one who’s being stalked from the shadows. Now, Gabe will do anything to keep Nikki safe—and to stop the de Vincent curse from striking again.

Scientific English Robert A. Day, Nancy Sakaduski, 2011-06-16 This entertaining and highly readable book gives anyone writing in the sciences a clear and easy-to-follow guide to the English language. English is often regarded as one of the most difficult languages to master. Yet while the English language has a vocabulary of upwards of 500,000 words, it only uses nine parts of speech, and all of these words fall into one (or more) of those nine categories. *Scientific English: A Guide for Scientists and Other Professionals*, Third Edition contains many simple revelations like this that make effective scientific writing in English easy, even for those whose fluency is in another language. The book is organized around a basic guide to English grammar that is specifically tailored to the needs of scientists, science writers, science educators, and science students. The authors explain the goals of scientific writing, the role of style, and the various kinds of writing in the sciences, then provide a basic guide to the fundamentals of English and address problem areas such as redundancies, abbreviations

and acronyms, jargon, and foreign terms. Email, online publishing, blogs, and writing for the Web are covered as well. This book is designed to be an enlightening and entertaining read that can then be retained as a practical scientific writing reference guide.

Boat People Mayra Santos-Febres,2021-06-15 Poetry. African & African American Studies. Latinx Studies. Translated by Vanessa Pérez-Rosario. Mayra Santos-Febres is one of our most powerful writers, and BOAT PEOPLE has long been a part of the poetic counter-tradition that shaped generations of Puerto Rican poets. Thanks to Vanessa Pérez-Rosario, English-language readers are now plunged into the depths of a text that, to echo Patrick Chamoiseau, is composed of 'that strange conference of poets and great beings, ' lost at sea, tossed on shores, or caught in a world without return address or safe passage. Written like a border drawn on water, this oceanic book is both a source of life and a record of death. It remains as devastatingly urgent as the day it was written.--Raquel Salas Rivera The ocean in BOAT PEOPLE is haunted and the book is the heartbreaking journey from sea to horizon. Melancholy and songlike, Santos-Febres documents the nameless, the chum: bodies set adrift by commerce. Like M. NourBese Philips's Zong!, this phenomenal translation in which I become 'a drop of fish sweat, ' my body dancing to the poetry's music but also lamenting the violences that underlie it.--Carmen Giménez Smith

Handbook of Classroom Management Carolyn M. Evertson,Carol Simon Weinstein,2006 Aims to: clarify the term classroom management; demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers' managerial tasks; bring together disparate lines of research and encourage conversations across various areas of inquiry; and promote an agenda for research in this area.

Representing Reality Bill Nichols,1991 This book offers a conceptual overview of documentary filmmaking practice. It addresses numerous social issues and how they are presented to the viewer by means of style, rhetoric, and narrative technique. The volume poses questions about the relationship of the documentary tradition to power, the body, authority, knowledge, and our experience of history. This study advances the pioneering work of Nichols's earlier book, *Ideology and the Image*. The rigorous discussion of modes of documentary representation, the relationship between narrative and nonfiction, and the representation of the body (including a chapter on pornography, ethnography, and power), give this book enormous value for the study of visual anthropology and ethnographic film. The often neglected relationship between signifier and referent is the special focus of this intensive study of documentary film. The concluding discussion of the representation of the body will also be of special interest to semioticians.
