Sociology in Action Diane Symbaluk, Tami M. Bereska, 2018-02-16 The essence of sociology lies in the sociological imagination. *Sociology in Action: A Canadian Perspective, Third Edition*, articulates the importance of developing a sociological imagination and highlights the tools that are necessary to develop that skill: empirical research methods that create verifiable knowledge, sociological theories that explain that knowledge, and critical thinking that enables us to evaluate and to extrapolate from that knowledge. By the time students have completed this text, they will be better equipped to engage in effective social action in the context of their families, communities, and professions, as well as in the context of larger social problems such as social inequality and environmental degradation. With their signature passion and *Sociological Toolkit*, Diane Symbaluk and Tami Bereska have created a text that will inspire 21st-century learners to become active and informed citizens.

Our Social World Jeanne H. Ballantine, Keith A. Roberts, 2011-10-26 In this brief text, two leaders of the Teaching Sociology movement encourage students' development of their sociological imaginations through role-taking. Assuming the role of a child living in poverty in India or of a member of an African tribe, students learn to re-envision their global society. An innovative, integrated framework provides core sociological concepts, while features such as *Contributing to Our Social World* enable students to "do" public sociology. *Our Social World: Condensed Version* presents the perspective of students living in the larger global world.

Power, Politics, and Society Betty A Dobratz, 2015-10-14 *Power, Politics & Society: An Introduction to Political Sociology* discusses how sociologists have organized the study of politics into conceptual frameworks, and how each of these frameworks foster a sociological perspective on power and politics in society. This includes discussing how these frameworks can be applied to understanding current issues and other real life aspects of politics. The authors connect with students by engaging them in activities where they complete their own applications of theory, hypothesis testing, and forms of inquiry.

Hutchison, Leanne Wood Charlesworth, 2023-10-22 *Dimensions of Human Behavior: Person and Environment* offers a comprehensive examination of human behavior using a multidimensional framework, which breaks down the core content along three primary dimensions: Person, Environment and Time. They encourage students to relate their personal experiences to societal trends, emphasizing the pivotal interplay between the individual and the environment. Aligned with the 2022 curriculum guidelines set forth by the Council on Social Work Education (CSWE), the updated Seventh Edition includes a greater emphasis on culture and diversity, immigration, neuroscience, and the impact of the COVID-19 pandemic. Down to Earth Sociology James M. Henslin, 2005 The twelfth edition's new readings include selections on the unspoken rules of social interaction, the shocking disparities between upper- and lower-class life, America's changing attitudes toward work and family and the roles they fulfill, and the McDonaldization of American society. Together with these essential new articles, the selections by Peter Berger, Herbert Gans, Erving Goffman, Donna Eder, Zella Luria, C. Wright Mills, Deborah Tannen, Barrie Thorne, Sidney Katz, Philip Zimbardo, and many others provide firsthand reporting that gives students a sense of being there. Henslin also explains basic methods of social research, providing insight into how sociologists explore the social world. The selections in Down to Earth Sociology highlight the most significant themes of contemporary sociology, ranging from the sociology of gender, power, politics, sports, and religion, to the contemporary crises of racial tension, crime, rape, poverty, and homelessness.

Essential Epidemiology Penny Webb, 2011 The new edition of this popular textbook remains a clear and practical introduction to epidemiology for students in all areas of health. By emphasising the role of epidemiology across a broad range of health monitoring and research, it gives students an understanding of the fundamental principles common to all areas of epidemiology. It also integrates the study of infectious and chronic diseases as well as public health and clinical epidemiology. Avoiding complex mathematics, it steps through the methods and potential problems underlying health data and reports, while maintaining a balance of rigour and clarity. The nuts-and-bolts of epidemiology are embedded in the wider international health perspective through recent and classical examples across different areas of health to engage students

from a range of backgrounds. Concepts are illustrated with charts and graphs, and end-of-chapter questions test understanding (with answers provided). Online resources include further exercises, slides for teaching and useful weblinks-- Provided by publisher.

Loomis's Essentials of Toxicology A. Wallace Hayes, Tao Wang, Darlene Dixon, Ted A. Loomis, 2019-10-25 Loomis's *Essentials of Toxicology*, Fifth Edition, provides the information on the harmful biologic effects associated with exposures to chemicals of all types. The scope of this book includes a discussion of the major types of chemicals involved, their general properties and detrimental biologic effects, the methods used to demonstrate these effects, the basis for clinical diagnosis, and therapy for the harmful effects of chemicals on humans. Essentials of Stochastic Processes Richard Durrett, 2016-11-07 Building upon the previous editions, this textbook is a first course in stochastic processes taken by undergraduate and graduate students (MS and PhD students from math, statistics, economics, computer science, engineering, and finance departments) who have had a course in probability theory. It covers Markov chains in discrete and continuous time, Poisson processes, renewal processes, martingales, and option pricing. One can only learn a subject by seeing it in action, so there are a large number of examples and more than 300 carefully chosen exercises to deepen the reader's understanding. Drawing from teaching experience and student feedback, there are many new examples and problems with solutions that use TI-83 to eliminate the tedious details of solving linear equations by hand, and the collection of exercises is much improved, with many more biological examples. Originally included in previous editions, material too advanced for this first course in stochastic processes has been eliminated while treatment of other topics useful for applications has been expanded. In addition, the ordering of topics has been improved; for example, the difficult subject of martingales is delayed until its usefulness can be applied in the treatment of mathematical finance.

Green Web-II Medani P. Bhandari, 2022-09-01 This second edition of the book, "Green Web-II: Standards and Perspectives from the IUCN Program / Policy Development in Environment Conservation Domain- with reference to India,

Pakistan, Nepal, and Bangladesh” investigates the IUCN’s role in global biodiversity conservation policy as well as in national program development in India, Pakistan, Nepal and Bangladesh. It explores how nature protection priorities and approaches are promoted or addressed by IUCN, and how environment conservation policies are created and maintained in states of South Asia with different capacities. It also evaluates IUCN's competency in biodiversity, climate change, nature conservation and environmental policy formulation at the global, regional and country levels. This book adds to our knowledge firstly by contributing to a small but growing body of work on the sociology of international organizations. International Governmental Organizations (IGOs), have previously been mainly the subject of political science. Secondly, it critically explores one of the largest and most active nature conservation organizations in the world. Thirdly, it also explores how IUCN actually goes about building protectoral programs with individual member nations. Finally, the research also shows the historical development of global institutions and IUCN’s activities with member nations in helping to define or redefine the concept of global governance. The outcomes of this research will also be beneficial for global collaboration, networking, and for the identification of common concerns among the many environmental and conservational organizations at the international and national level. In this broader sense, the research outcomes might be beneficial to constituencies of the global North as well as global South because of the nature and coverage of IUCN and its role in conservation policy formation. This effort may serve as a model for additional research on international organizations. Technical topics discussed in the book include: The Motivation for Environmental Conservation- How personal efforts make a difference The Role of International Environment Conservation Organizations The Political Economy of Organizations, Network theory, Institutional theory, Stakeholder theory, Governance theory Governance performance and Competitiveness Popularity indices Knowledge creation and diffusion Conservation commons

Study Skills for Master's Level Students, revised edition Debbie Casey, Liz Clark, Sally Hayes, 2013-04-19 From reviews: ...There are good sections on writing academically at master's level, how to get published and the benefits for postgraduates and the profession of sharing work. The authors conclude with a useful chapter on applying postgraduate skills in the workplace. This excellent guide will also be an invaluable resource in areas of study other than the intended health and social care field. Nursing Standard, Nov 13-19, 2013 This revised and updated edition of Study Skills for Master’s Level Students adopts a reflective approach using exercises that are related to the development of the skills required to make the transition from undergraduate to postgraduate thinking and writing. Questions and activities encourage students to identify the skills that the postgraduate student should possess and to demonstrate an understanding of how those skills are developed. Topics covered include: * Critical thinking * Developing independent study skills * Finding and using literature * Applying postgraduate skills in the workplace * Writing at Master’s level * How to get published. The book is easy to use and jargon-free with clearly defined learning goals. Reflection points are included in order to support independent learning and

enquiry, and there are also suggestions for additional reading throughout the book. Study Skills for Master's Level Students can therefore be used as an independent student study tool or by lecturers in workshop settings. Here's what lecturers thought of the first edition: A very comprehensive and accessible guide which is contemporary and related to application within the workplace. Easy to read and well presented. Very useful; activities excellent. I thought the complete book is a must for all postgraduate students. This book is excellent and I wish I had had a chance to read [it] pre my MSc course.

Essential Criminology Mark M. Lanier, Stuart Henry, Desire' J.M. Anastasia, 2018-04-19 In the fourth edition of Essential Criminology, authors Mark M. Lanier, Stuart Henry, and Desire .M. The book guides students through the various definitions of crime and the different ways crime is measured. It then covers the major theories of crime, from individual-level, classical, and rational choice to biological, psychological, social learning, social control, and interactionist perspectives. In this latest edition, the authors explore the kind of criminology that is needed for the globally interdependent twenty-first century. With cutting-edge updates, illustrative real-world examples, and new study tools for students, this text is a necessity for both undergraduate and graduate courses in criminology.

Everyday Community Practice Amanda Howard, Margot Rawsthorne, 2020-07-16 Increasingly students and practitioners in human services are asked or seek to include community engagement, participation and capacity building in their work with groups. In this book expert authors Amanda Howard and Margot Rawsthorne provide guidance on the theory and practice of working with communities, from preliminary planning and scoping before direct work with the community begins, through to evaluation. They explore key issues including developing an understanding of community life, facilitating and supporting community action, understanding and acting on structural inequity, managing negotiation and conflict, and building productive networks. They draw extensively on their own work with communities and research to create a dialogue with the reader on the interaction of task and process in everyday community practice. Written in a friendly and accessible style and featuring the voices of community workers throughout, this is a vital guide for anyone seeking to encourage positive change in an important field of practice. 'This is a splendid addition to the community work literature, offering wise and judicious guidance for those engaged knee-deep in community practice ... it acknowledges that the increasing emphasis on individualised service options has too often led to the neglect of understanding the benefits of collective action within diverse and dynamic communities.' - Dr Winsome Roberts, Honorary Senior Fellow, Department of Social Work, University of Melbourne

Ethics and Experiments Scott Desposato, 2015-12-22 For most of political science's history, discussions about

professional ethics had nothing to do with human subjects. Professional ethics involved integrity in the classroom, fair tenure and promotion rule, and the careful avoidance of plagiarism. As most research was observational, there was little need for attention to how scholarly activities might directly affect the subjects of our work. Times have changed. The dramatic growth in the use of experiments in social science, especially overseas, is generating unexpected ethical controversies. The purpose of this volume is to identify, debate, and propose practical solutions to the most critical of these new ethical issues. A leading team of internationally distinguished political science scholars presents the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies. Part 1 examines contextual challenges provided by experiments conducted overseas - questions of culture, religion, security, and poverty. Part 2 examines questions of legal constraints on research, focusing on questions of foreign review of international experiments. Part 3 tackles the critical issues in field experiments, including deception and consent, impact on elections and careers, the boundaries of the public officials' exemption, and the use of partner organizations to avoid Institutional Review Body (IRB) review. Part 4 considers strategies for the future, including training and education, IRB reform, institutional changes, and norm development.
