The Geography of Greece Régis Darques, George Sidiropoulos, Kostas Kalabokidis, 2024-02-22 During the last few years, Greece has become a subject of increasing attention worldwide. Once praised for its ability to innovate and reform during the EU integration process, applauded for its remarkable job in managing the 2004 Olympics, the country fell into a financial crisis of unprecedented magnitude in 2008. Much has been said on this matter, and amid the morass of information a staggering number of untruths have been disseminated. In fact, the challenges of vulnerability and the paradigms of adaptation go way beyond finance and economy in Greece. Mega-fires, earthquakes, landslides and floods, migrations, sociopolitical upheavals, and armed conflicts generate emergency situations repeatedly. Because of its bridging role between natural and social sciences, geography can provide insights into the entire breadth of hazardous and chaotic events driving adaptation and change. Against all these threats, Greece has developed an enhanced resilience capacity. The purpose of this book is to help unravel the complexities of a fascinating country beyond clichés. This book is intended for students, researchers, scholars, and engineers interested in geography, land planning, urban studies, and environmental management. The crises issue intended as a guideline allows widening the audience to include the media, governmental and non-governmental agencies, and the public at large.

Challenging Identities Shahram Akbarzadeh, 2010 Muslim women in Australia are at the forefront of a culture war, and not necessarily by choice. As visible representatives of Islam, veiled women face discrimination and abuse, and carry the stigma of a culture frequently deemed unacceptable and inferior. Despite these adverse conditions, Muslim women have demonstrated a remarkable resilience by maintaining their presence in the public domain and by continuing to make a positive contribution to Australia. The experiences of Muslim women in Australia cannot be typecast as a sisterhood of oppressed females. Challenging Identities questions the assumption of incompatible 'Australian values' and 'Islamic values', and provides valuable first-person accounts from the lives of Muslim women in Australia.--Publisher description.

Exploring World History through Geography Julie Crea Dunbar, 2022-09-29 Not your run-of-the-mill world history tome, this book takes readers on a fascinating journey through time to examine world history through the closely related discipline of geography. From the early civilizations of ancient Mesopotamia to our present-day globalized society, readers will learn how humans interacted - and still interact - with the environment around them, as well as the environment's role in not only shaping the society's world view but enabling the building of socially stratified and successful civilizations. Additionally, the book examines how civilizations interacted with others, from developing cross-boundary trade to initiating wars of expansion. Finally, readers will also understand the impact of the study and application of geography, such as the creation and use of maps and the study of cultures and Earth's processes. Readers will come away with a new understanding of the relevance of geography to not only human history but contemporary events, as well as their day-to-day lives. By presenting this history from a slightly different, geographic point of view, this book will inspire fresh curiosity in the world, both past and present.

The People J. Lawrence Angel,1971-11-21 The second volume of the publication of the excavations at Lerna (published jointly with the Smithsonian Institute) deals with the human bones that were found and gives a physical anthropological study of them. Skeletons from Neolithic to Roman times are described and measured in detail, studied against the ecological, historical, and cultural background of the area, and interpreted in terms of (1) demography, (2) health and disease status, (3) body build and posture, (4) microevolution, (5) genetic relationships or connections with other populations. Although the author had for many years been studying the physical anthropology of the bones from many areas of Greece, Lerna was the first site that offered him a sufficient number of sufficiently well-preserved skeletons over so long a range of time as to allow a type of study long recognized as desirable. The significance of this study for early periods of archaeology is as great as the soundness of method and clarity of presentation.

Challenges and Barriers to the European Union Expansion to the Balkan Region Costa, Bruno Ferreira,2022-01-21 Despite all efforts to create a political union capable of improving European citizens' quality of life, there are several barriers to the European Union's (EU) expansion to the Balkan Region. The EU enlargement and expansion to the Balkan Region is one of the Union's greatest challenges and political objectives in recent years. In the turmoil of economic, social, and sanitarian crises, where is the space to debate the enlargement of the EU? Challenges and Barriers to the European Union Expansion to the Balkan Region presents the EU's structure, the process of enlargement, and the challenges related to the Balkan region. This book addresses critical issues and challenges in the EU and the emerging trends for the EU's future. Covering topics such as enlargement policy, integration, NATO, and political challenges, this book is a valuable resource for post-grad students of political science and international affairs, faculty of higher education, researchers, academicians, politicians, world leaders, and policymakers.

The Geography of Thought Richard E. Nisbett,2011-01-11 When Richard Nisbett showed an animated underwater scene to his American students, they zeroed in on a big fish swimming among smaller fish. Japanese subjects, on the other hand, made observations about the background environment...and the different seeings are a clue to profound underlying cognitive differences between Westerners and East Asians. As Professor Nisbett shows in *The Geography of Thought* people actually think - and even see - the world differently, because of differing ecologies, social structures, philosophies, and educational systems that date back to ancient Greece and China, and that have survived into the modern world. As a result, East Asian thought is holistic - drawn to the perceptual field as a whole, and to relations among objects and events within that field. By comparison to Western modes of reasoning, East Asian thought relies far less on categories, or on formal logic; it is fundamentally dialectic, seeking a middle way between opposing thoughts. By contrast, Westerners focus on salient objects or people, use attributes to assign them to categories, and apply rules of formal logic to understand their behaviour.

History of Greek Literature Albrecht Dihle,2013-04-15 The most up-to-date history of Greek literature from its Homeric origins to the age of Augustus. Greek literary production throughout this period of some eight centuries is embedded in its historical and social context, and Professor Dihle sees this literature as a historical phenomenon, a particular mode of linguistic communication, with its specific forms developing both in an organic way and in response to the changing world around. In this it differs from conventional humanist approaches to Greek and Latin literature which analyse the works as objects of timeless value independent of any historical setting or purpose. This magisterial survey by one of the leading European authorities on classical literature will establish itself, as it already has in Germany, as the standard account of the subject.

New Perspectives on the Greek War of Independence Yianni Cartledge,Andrekos Varnava,2022-11-23 This book marks the 200-year anniversary of uprisings in the Ottoman Balkans between February and March 1821, which became known in the West as the beginnings of the Greek War of Independence (1821-1832), and led to the formation of the modern Greek state. It explores the war and its impact on societies involved by delving into the myths that surround it, the realities that have often been ignored or suppressed, and its lasting legacies on national identities and histories. It also explores memory and commemoration in Greece, in other countries impacted, and the Greek diaspora. This book offers a fresh perspective on this pivotal event in Greek, Ottoman, Balkan, Mediterranean, European, and world histories. It presents new research and reflections to connect the war to wider history and to understand its importance across the last 200 years.

Localism and the Ancient Greek City-State Hans Beck,2020-07-31 A Greek historian investigates the importance of local identity in the Mediterranean world in a “rare, genuinely original book . . . Highly recommended” (Choice). Much as our modern world is interconnected through global networks, the ancient Greek city-states were a dynamic part of the wider Mediterranean landscape. In *Localism and the Ancient Greek World*, historian Hans Beck argues that local shifts in politics, religion and culture had a pervasive influence in a world of fast-paced change. Citizens in these communities were deeply concerned with maintaining local identity, commercial freedom, distinct religious cults, and much more. Beyond these cultural identifiers, there lay a deeper concept of the local that guided polis societies in their contact with a rapidly expanding world. Drawing on a staggering range of materials—including texts by both known and obscure writers, numismatics, pottery analysis, and archeological records—Beck develops fine-grained case studies that illustrate the significance of the local experience. *Localism and the Ancient Greek City-State* builds bridges across disciplines and ideas within the humanities. It highlights the importance of localism not only in the archaeology of the ancient Mediterranean, but also in today’s conversations about globalism, networks, and migration.

Turbulence in the Eastern Mediterranean Emile Hokayem,Rym Momtaz,2024-12-06 The IISS Strategic Dossier

Turbulence in the Eastern Mediterranean: Geopolitical, Security and Energy Dynamics surveys the geopolitical landscape, defence dynamics and energy prospects of the region that spans Cyprus, Egypt, Greece, Israel and the Occupied Palestinian Territories, Lebanon, Libya, Syria and Turkiye. It assesses the security outlook for the region, considering potential flashpoints for intra- and inter-state conflict and evaluating whether newly developed defence ties could evolve into formal alliances. Energy discoveries made in the region in recent years have spurred states' ambitions to become energy hubs. The dossier evaluates whether such aspirations could lay the foundations for deeper regional cooperation or, conversely, increase the risk of confrontation. The dossier includes both thematic and country-specific chapters. In addition to the countries in the area of study, it explores the involvement of seven external powers – China, the European Union, France, the Gulf Cooperation Council states, NATO, Russia and the United States – and assesses where the opportunities and risks for these actors lie. This volume will be essential for policymakers and business leaders seeking a better understanding of the factors shaping the geopolitics of the Eastern Mediterranean region.
