Novial Lexike Otto Jespersen,2013-10-28 First published in 2006. Novial (NOV - new, International Auxiliary Language)is one of the easiest constructed languages, partly because it highly resembles English. The multilingual dictionary of 1930,

Novial-Lexike, may be in itself a sufficient guide to learn Novial. The reader will find : (1) an introduction showing the urgent need for such a language, (2) the history of the movement with criticism of earlier proposed artificial languages, (3) a detailed grammar, in which, chapter by chapter. the reasons are given that have led to precisely those and to no other forms , (4) the scientific principles of word selection, and (5) some specimens intended to show the use of the language for different purposes and in different styles.

The Universe of Things Steven Shaviro,2014-10-01 From the rediscovery of Alfred North Whitehead’s work to the rise of new materialist thought, including object-oriented ontology, there has been a rapid turn toward speculation in philosophy as a way of moving beyond solely human perceptions of nature and existence. Now Steven Shaviro maps this quickly emerging speculative realism, which is already dramatically influencing how we interpret reality and our place in a universe in which humans are not the measure of all things. The Universe of Things explores the common insistence of speculative realism on a noncorrelationist thought: that things or objects exist apart from how our own human minds relate to and comprehend them. Shaviro focuses on how Whitehead both anticipates and offers challenges to prevailing speculative realist thought, moving between Whitehead’s own panpsychism, Harman’s object-oriented ontology, and the reductionist eliminativism of Quentin Meillassoux and Ray Brassier. The stakes of this recent speculative realist thought—of the effort to develop new ways of grasping the world—are enormous as it becomes clear that our inherited assumptions are no longer adequate to describe, much less understand, the reality we experience around us. As Shaviro acknowledges, speculative realist thought has its dangers, but it also, like the best speculative fiction, holds the potential to liberate us from confining views of what is outside ourselves and, he believes, to reclaim aesthetics and beauty as a principle of life itself. Bringing together a wide array of contemporary thought, and evenhandedly assessing its current debates, The Universe of Things is an invaluable guide to the evolution of speculative realism and the provocation of Alfred North Whitehead’s pathbreaking work.

The Oxford Handbook of Victorian Literary Culture Juliet John,2016-06-30 The Oxford Handbook of Victorian Literary Culture is a major contribution to the dynamic field of Victorian studies. This collection of 37 original chapters by leading international Victorian scholars offers new approaches to familiar themes including science, religion, and gender, and gives space to newer and emerging topics including old age, fair play, and economics. Structured around three broad sections (Ways of Being: Identity and Ideology, Ways of Understanding: Knowledge and Belief, and Ways of Communicating:

Print and Other Cultures), the volume is sub-divided into nine sub-sections each with its own 'lead' essay: on subjectivity, politics, gender and sexuality, place and race, religion, science, material and mass culture, aesthetics and visual culture, and theatrical culture. The collection, like today's Victorian studies, is thoroughly interdisciplinary and yet its substantial Introduction explores a concern which is evident both implicitly and explicitly in the volume's essays: that is, the nature and status of 'literary' culture and the literary from the Victorian period to the present. The diverse and wide-ranging essays present original scholarship framed accessibly for a mixed readership of advanced undergraduates, graduate students, and established scholars.

The Cremona Violin E.T.A. Hoffmann, 2022-05-16 Councillor Krespel is an eccentric violin maker who lives with the mysterious Antonia. Considered to have the most beautiful singing voice the town has ever heard; she has only sung once in her life. Krespel is renowned for making the finest violins in the world, but never sells any and plays each violin he makes only once. What is the dark secret behind this odd couple's behaviour? This classic short horror story was written by the famous German Romantic author E.T.A. Hoffmann and is perfect for fans of authors H.P. Lovecraft and Neil Gaiman. Ernst Theodor Wilhelm Hoffmann (1776-1822), better known as E. T. A. Hoffmann, was a German Romantic author of fantasy and gothic horror. He was also a composer, music critic, draftsman and caricaturist. Hoffmann's stories inspired several famous operatic composers, including Richard Wagner, Jacques Offenbach and Léo Delibes. He is also the author of the novella 'The Nutcracker and the Mouse King', on which Tchaikovsky's famous ballet, 'The Nutcracker' is based. The story also inspired the film 'The Nutcracker and the Four Realms' (2018), starring Keira Knightley, Morgan Freeman, Helen Mirren.

From the Clarinet D'Amour to the Contra Bass Albert R. Rice, 2009-03-31 Following his much-acclaimed *The Baroque Clarinet and The Clarinet in the Classical Period*, Albert R. Rice now turns his signature detailed attention to large clarinets - the clarinet d'amour, the basset horn, the alto clarinet, bass and contra bass clarinets. Each chapter is devoted to a specific instrument, and offers a fascinating insider's look at its defining characteristics, a comprehensive history of its evolution, meticulously-researched information on its makers and aspects of construction, and a thorough discussion of its music. Rice illustrates how the introduction of large clarinets into chamber ensembles, wind bands, and opera orchestras was the result of experiments meant to address specific musical needs. Along the way, he brings to life the musicians, virtuosi, soloists, and orchestral and band musicians, as well as the instruments' makers and the composers from J. C. Bach to Smetana who wrote for them. Based on careful study of primary sources - musical compositions, patents, memoirs and diaries, and unfettered access to historical instruments themselves--Rice's expert presentation is nothing short of exhaustive. *From the Clarinet d'Amour to the Contrabass* will engage all who love the clarinet and its music.

Mobility, Meaning and Transformations of Things Hans Peter Hahn,Hadas Weis,2013-01-31 Things travel around the globe: they are shipped as mass consumer goods, or transported as souvenirs or gifts. There are infinite ways for things to be mobile, not only in the era of globalisation but since the beginning of time, as the earliest traces of long distance trading show. This book investigates the mobility of things from archaeological and anthropological perspectives. Material Objects are characterised by temporal continuity, embodying a prior existence with lingering effects. Yet the material continuity disguises the transformations they may undergo, which only become evident upon closer examination. Objects are in perpetual flux, leaving visible traces of their age, usage, and previous life. While travelling through time, objects also circulate through space, and their spatial mobility alters their meaning and use with respect to new cultural horizons. As objects transform through time and space, so does the value attributed to them. Mapping out itineraries of value in the realm of the material, allows us to grasp the nature of a given social formation through the shape and meaning taken on by its valued 'stuff'. It also provides insights into the nature of materiality, through the value ascribed to objects at a given point in time and space. This edited volume brings together studies of material culture, materiality and value, with regard to the mobility of objects, with the aim of tracing the ways in which societies constitute their valued objects and how the realm of the material reflects upon society.
