Lyrics 1964-2016 Paul Simon,2016-06-28 This comprehensive collection from the legendary folk icon features lyrics from each of Simon's 10 original studio albums, as well as lyrics from the renowned Simon & Garfunkel records. 50 b&w photographs throughout.

Can God be Trusted? John G. Stackhouse,2000 Why does an all-powerful, all good God allow evil to happen? This book offers a lucid and accessible overview of this intractable problem. It presents the reflections of classical and contemporary thinkers, and gives clues as to how God governs the cosmos, while arguing that a comprehensive explanation is not available. Instead, it asks whether God can be trusted in spite of evil and suggests why the reply can ultimately be Yes.

La double mobilité en marche dans les prothèses totales de hanche Michel-Henry Fessy,Denis Hutten,2018-11-20 Utilisées pour réduire le risque d'instabilité des prothèses totales de hanche, les cupules à double mobilité sont connues des chirurgiens orthopédistes français depuis plus de 20 ans. Aujourd'hui arrivées à maturité, elles prennent une importance croissante dans les arthroplasties totales de première intention à haut risque de luxation (sujets âgés, obèses, fractures du col fémoral, patients neurologiques, arthrodèses rachidiennes, reconstruction après exérèse pour tumeur...) et plus encore dans les arthroplasties de révision frappées d'un taux élevé de luxation. L'objectif de cette monographie est de montrer comment ces cupules assurent les meilleures stabilité et mobilité possibles mais aussi une survie satisfaisante par le biais d'une fixation durable et une usure minimale. Le lecteur y trouvera les chapitres suivants : - Où en sommes-nous en 2018 ? - Biomécanique - Dessins - Fixation - Matériaux - Aspects chirurgicaux - Risques et complications - Résultats selon le terrain et l'étiologie - Résultats à plus de 10 ans - Chirurgie de révision - Aspects médico-économiques Cette monographie, richement illustrée, contient les contributions de tous les spécialistes ayant travaillé sur ce concept.

Rural-Urban Dynamics in the East African Mountains Racaud, Sylvain,Bart, Francois,2017-07-19 This book is the result of a long-term cooperation between French and East African scholars and universities under the aegis of the French Institute of Research in Africa (IFRA-Nairobi). This book presents the main results of the research program Cooperation for University and Scientific Research (CORUS): Mountains and Small and Medium Cities in East Africa: Environmental Management, Flows of People and Resources, funded by the French Ministry of Foreign Affairs and supported by IFRA-

Nairobi. The specific subject is to rethink the development of the East African mountains in relation to the fast growing towns and cities that surround them. Three East-African mountains were chosen: Mount Kenya, Mount Elgon (Ugandan side) and Uporoto Mountains (Tanzania). Comparisons are included, especially with Mount Kilimanjaro, which has been studied in previous books and programs (e.g. Kilimanjaro: Mountain, Memory and Modernity, Mkuki na Nyota, Dar es Salaam, 2006). The authors are East African (Tanzania, Uganda, Kenya) and French scholars, most of them geographers. Made from 12 contributions, this book focuses on a recent change in those mountains: a growing urbanization which shapes new mountain systems. This phenomenon, which is actually a major upheaval, is the focal point of this book, giving rise to this question: what are the links between Rural-Urban evolution in such contexts? What are the impacts on livelihoods and development? This book, covering social and environmental scientific issues relating to Rural-Urban nature, is the first of its kind for African mountains.

Fire Safety of Historical Buildings Gabriele Bernardini, 2017-04-19 This book applies a behavioral point of view to individuals' fire safety in historic buildings. It outlines theoretical and operative issues, based on recent studies and international guidelines. Firstly, critical issues for Building Heritage fire safety are widely discussed, by including the modelling of human factor and man-environment-fire interference in these architectural spaces. A significant part of the book includes a discussion on emergency modeling and simulation. A source code for representing the fire evacuation process (including man-evacuation facilities interactions) is offered to the reader. Methods for effectiveness assessment of risk-reducing solutions are provided and tested in a case-study. Being a structured approach to occupants-related problems during a fire in heritage buildings, it offers an innovative methodology and practical examples that researchers and designers can use as a guide when proposing and testing solutions. Evaluation indexes for effectiveness assessment (also useful for future guidelines or handbooks) are included. Readers are encouraged to understand these indexes within the proposed approach, so as to extend their applications and possibilities of how to introduce human behaviors-based solutions in other fields. Lastly, attention is focused on the proposal and evaluation of low-impact and not-invasive strategies, such as ones based on wayfinding elements. From this point of view, the pros and cons of wayfinding systems are discussed: these are important today, especially for fire-safety designers, because of the ongoing innovations in this field.

The Mediatization of Culture and Society Stig Hjarvard, 2013-03-12 Mediatization has emerged as a key concept to reconsider old, yet fundamental questions about the role and influence of media in culture and society. In particular the theory of mediatization has proved fruitful for the analysis of how media spread to, become intertwined with, and influence other social institutions and cultural phenomena like politics, play and religion. This book presents a major contribution to the theoretical understanding of the mediatization of culture and society. This is supplemented by in-depth studies of: The mediatization of politics: From party press to opinion industry; The mediatization of religion: From the faith of the church to

the enchantment of the media; The mediatization of play: From bricks to bytes; The mediatization of habitus: The social character of a new individualism. Mediatization represents a new social condition in which the media have emerged as an important institution in society at the same time as they have become integrated into the very fabric of social and cultural life. Making use of a broad conception of the media as technologies, institutions and aesthetic forms, Stig Hjarvard considers how characteristics of both old and new media come to influence human interaction, social institutions and cultural imaginations.

Emergent Macroeconomics Domenico Gatti, Edoardo Gaffeo, Mauro Gallegati, Gianfranco Giulioni, Antonio Palestrini, 2008-12-05 This valuable book contributes substantively to the current state-of-the-art of macroeconomics. It provides a method for building models in which business cycles and economic growth emerge from the interactions of a large number of heterogeneous agents. Drawing from recent advances in agent-based computational modeling, the authors show how insights from dispersed fields can be fruitfully combined to improve our understanding of macroeconomic dynamics.

The Labour of Subjectivity Andrea Rossi, 2015-11-30 Michel Foucault defined critique as an exercise in de-subjectivation. To what extent did this claim shape his philosophical practice? What are its theoretical and ethical justifications? Why did Foucault come to view the production of subjectivity as a key site of political and intellectual emancipation in the present? Andrea Rossi pursues these questions in *The Labour of Subjectivity*. The book re-examines the genealogy of the politics of subjectivity that Foucault began to outline in his lectures at the Collège de France in the late 1970s and early 1980s. He explores Christian confession, *raison d'état*, biopolitics and bioeconomy as the different technologies by which Western politics has attempted to produce, regulate and give form to the subjectivity of its subjects. Ultimately Rossi argues that Foucault's critical project can only be comprehended within the context of this historico-political trajectory, as an attempt to give the extant politics of the self a new horizon.

Visibility in Social Theory and Social Research A. Mubi Brighenti, 2010-07-21 What is social visibility? How does it affect people and public issues? How are visibility regimes created, organized and contested? Tackling both social theory and social research, the book is an exploration into how intervisibilities produce crucial sociotechnical and biopolitical effects.

Noonan Syndrome and Related Disorders - A Matter of Deregulated Ras Signaling M. Zenker, M. Schmid, 2008-10-02 In this book, internationally recognized experts review the most important advances regarding the group of human developmental disorders caused by constitutive dysregulation of the Ras-MAPK signalling pathway, including Noonan, cardiofaciocutaneous, LEOPARD and Costello syndromes. A historical overview given by Jacqueline Noonan is followed by chapters dedicated to comprehensive clinical summaries of each condition and up-to-date reviews on associated gene mutations and molecular pathomechanisms. Genotype-phenotype correlations are outlined. Further topics include the characterization and underlying mechanisms of common abnormalities in these syndromes such as growth failure, heart

defects, and tumor risk. Animal models and the relation to neurofibromatosis type 1 are discussed. The final chapter covers the critical area of treatment including prospects emerging from an improved understanding of the pathophysiology of these disorders. Providing a concise overview of a very rapidly developing field and suggesting ways how to integrate the latest findings from basic molecular research into clinical practice, this book will be of interest to clinical geneticists, pediatricians, pediatric cardiologists, and pediatric endocrinologists, as well as to human molecular geneticists and other basic researchers working on the RAS pathway.

Organized Secularism in the United States Ryan T. Cragun, Christel Manning, Lori L. Fazzino, 2017-11-07 There has been a dramatic increase in the percentage of the US population that is not religious. However, there is, to date, very little research on the social movement that is organizing to serve the needs of and advocate for the nonreligious in the US. This is a book about the rise and structure of organized secularism in the United States. By organized secularism we mean the efforts of nonreligious individuals to build institutions, networks, and ultimately a movement that serves their interests in a predominantly religious society. Researchers from various fields address questions such as: What secularist organizations exist? Who are the members of these organizations? What kinds of organizations do they create? What functions do these organizations provide for their members? How do the secularist organizations of today compare to those of the past? And what is their likely impact on the future of secularism? For anyone trying to understand the rise of the nonreligious in the US, this book will provide valuable insights into organized efforts to normalize their worldview and advocate for their equal treatment in society.

Art Worlds Howard Saul Becker, 1982 Argues that art works are not the creation of isolated individuals but result from cooperation between different artists, suppliers of materials, art distributors, critics, and audiences, who together make up the art world.

Stroke Syndromes, 3ed Louis R. Caplan, Jan Gijn, 2012-07-12 A comprehensive survey of dysfunction due to stroke, this revised edition remains the definitive guide to stroke patterns and syndromes.

The Elderly Eyewitness in Court Michael P. Toglia, David F. Ross, Joanna Pozzulo, Emily Pica, 2014-02-18 The majority of research on eyewitness memory has traditionally studied children and young adults. By contrast, this volume is designed to provide an overview of empirical research on the cognitive, social, and health related factors that impact the accuracy of eyewitness testimony given by the elderly. The book takes a lifespan developmental perspective that incorporates research on witnesses of all ages, but uses the findings to focus on issues unique to the elderly. This includes research on recognition memory with lineup identifications and recall memory that occurs when an elderly witness is asked to describe an event in court. The Elderly Eyewitness also examines jurors' reactions to the testimony of an elderly witness, and the legal and social policy issues that emerge when the elderly witness participate in legal proceedings. While reviewing what is known about the

elderly witness, the book also provides a direction for future research into this new frontier of scientific inquiry. Its audience spans researchers in cognitive and developmental psychology, and professionals working in the growing area of psychology and law.

Corpus Jean-Luc Nancy, 2009-08-25 How have we thought “the body”? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the “mystical body of Christ”—all these (and others) are incorporated in the word Corpus, the title and topic of Jean-Luc Nancy’s masterwork. Corpus is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the “corpus” from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the “mind-body problem” formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is “The Intruder,” Nancy’s philosophical meditation on his heart transplant. The book also serves as the opening move in Nancy’s larger project called “The deconstruction of Christianity.”

Lexical Plurals Paolo Acquaviva, 2008-03-06 This book explores the wide variety of cases in which the plural of nouns is lexical. When a plural is lexicalized it becomes part of what it is to know a certain word: pence, for example, is lexical because it means a plurality of a certain kind - a multiple value, not a set of physical objects like pennies - and knowing this reading is knowing the word. Languages exhibit countless examples of similar word-dependent irregularities in the form and meaning of plural, but these have never been analyzed in depth from a unified perspective. Dr Acquaviva aims to do just that, using analytic tools from formal semantics and theoretical morphology to shed light on the relation between grammar and the lexicon. After an introduction setting out his approach he divides the book into two parts. The first gives a structured description of the ways plurality can be lexicalized with an emphasis on description and categorization. The second analyzes in depth different types of lexical plurals in Italian, Irish, Arabic and Breton. A final chapter spells out the theoretical consequences for the analysis of the lexicon. The book is unusual in combining a broad typological classification with a unified morphological and semantic analysis based on a formal framework.

Student Politics in Africa Luescher, Thierry M., Klemencic, Manja, 2016-05-12 The second volume of the African Higher Education Dynamics Series brings together the research of an international network of higher education scholars with interest in higher education and student politics in Africa. Most authors are early career academics who teach and conduct

research in universities across the continent, and who came together for a research project and related workshops and a symposium on student representation in African higher education governance. The book includes theoretical chapters on student organising, student activism and representation; chapters on historical and current developments in student politics in Anglophone and Francophone Africa; and in-depth case studies on student representation and activism in a cross-section of universities and countries. The book provides a unique resource for academics, university leaders and student affairs professionals as well as student leaders and policy-makers in Africa and elsewhere.

Putin's Dark Ages Dina Khapaeva, 2023-10-26 Two decades before the war against Ukraine, a “special operation” was launched against Russian historical memory, aggressively reshaping the nation’s understanding of its history and identity. The Kremlin’s militarization of Russia through World War II propaganda is well documented, but the glorification of Russian medieval society and its warlords as a source of support for Putinism has yet to be explored. This book offers the first comparison of Putin’s political neomedievalism and re-Stalinization and introduces the concept of mobmemory to the study of right-wing populism. It argues that the celebration of the oprichnina, Ivan the Terrible’s regime of state terror (1565–1572), has been fused with the rehabilitation of Stalinism to reconstruct the Russian Empire. The post-Soviet case suggests that the global obsession with the Middle Ages is not purely an aesthetic movement but a potential weapon against democracy. The book is intended for students, scholars, and non-specialists interested in understanding Russia’s anti-modern politics and the Russians’ support for the terror unleashed against Ukraine.

The Ossetes Richard Foltz, 2021-12-30 The Ossetes, a small nation inhabiting two adjacent states in the central Caucasus, are the last remaining linguistic and cultural descendants of the ancient nomadic Scythians who dominated the Eurasian steppe from the Balkans to Mongolia for well over one thousand years. A nominally Christian nation speaking a language distantly related to Persian, the Ossetes have inherited much of the culture of the medieval Alans who brought equestrian culture to Europe. They have preserved a rich oral literature through the epic of the Narts, a body of heroic legends that shares much in common with the Persian Book of Kings and other works of Indo-European mythology. This is the first book devoted to the little-known history and culture of the Ossetes to appear in any Western language. Charting Ossetian history from Antiquity to today, it will be a vital contribution to the fields of Iranian, Caucasian, Post-Soviet and Indo-European Studies.
