**Shooting to Kill** Simon Bronitt, Miriam Gani, Saskia Hufnagel, 2012-11-05 The present book brings together perspectives from different disciplinary fields to examine the significant legal, moral and political issues which arise in relation to the use of lethal force in both domestic and international law. These issues have particular salience in the counter terrorism context following 9/11 (which brought with it the spectre of shooting down hijacked airplanes) and the use of force in Operation Kratos that led to the tragic shooting of Jean Charles de Menezes. Concerns about the use of excessive force, however, are not confined to the terrorist situation. The essays in this collection examine how the state sanctions the use of lethal force in varied ways: through the doctrines of public and private self-defence and the development of legislation and case law that excuses or justifies the use of lethal force in the course of executing an arrest, preventing crime or disorder or protecting private property. An important theme is how the domestic and international legal orders intersect and continually influence one another. While legal approaches to the use of lethal force share common features, the context within which force is deployed varies greatly. Key issues explored in this volume are the extent to which domestic and international law authorise pre-emptive use of force, and how necessity and reasonableness are legally constructed in this context.

Ethics, Law and Health Care Fiona McDonald, Shih-Ning Then, 2019-03-29 Understanding ethics and law in health care is an essential part of nurse and midwife professional standards, and a core component of qualifying programmes. Ethics, Law and Health Care teaches applied ethics and law in a way that illustrates the real world applications of these essential aspects of practice. It enables readers to not only recognise but also address legal and ethical issues that will arise in their professional practice. The book approaches these issues using the Australian Nursing and Midwifery Codes of Ethics, the Codes of Professional Conduct and the four principles of biomedical ethics: - Autonomy - Non-maleficence - Beneficence - Justice. Filled with case studies, review questions and useful further reading, this book gives readers a solid understanding of

ethics and law in health care, and a clear decision-making framework so they can take action confidently. Please note, this book is written specifically for the Australian market. New to this Edition: - A new chapter on health, law, ethics and Aboriginal and Torres Strait Islanders - Illustrated with 'real world' applications, the book ensures students understand how core components of the nursing and midwifery curriculum are put in to practice - Copies of the Codes of Ethics and Professional Conduct for Nurses and Midwives are provided as appendixes for ease of reference

**The Inquest Handbook** Hugh Selby,1998 The book explains the role and objectives of the inquest. It highlights the forms of investigations in several types of fatal accident and gives guidance about the central legal issues and matters of case preparation and presentation. Starting with chapters on the law and the lawyer's preparation, it then discusses what the police do and why, the place of the autopsy, coroner's enquiries and recommendations, and the reasons for and extent of media interest. It covers the forms of investigations in road accidents, natural disasters, drug overdoses, medical or surgical mishaps, pathology and sudden unexpected infant death. It emphasises that inquests are collaborative ventures, often multi-disciplinary events and multi-party, too. Derrick W Hand, New South Wales State Coroner, recommends the book: The Inquest Handbook is of great importance because it contains up-to-date, comprehensive information by persons considered expert in their field. Not only will it help those working in the coronial jurisdiction, it will also help others to understand the coronial process.

**The Parenthood Dilemma** Gina Rushton,2023-09-05 *Our Culture Magazine* Best Book of 2023 “Rushton's work is generous, thoughtful, and honest, taking care neither to romanticize nor to disparage the choice to become a parent.” —Jenny Hamilton, *Booklist* (starred review) A bold feminist investigation into the mother of all questions; whether or not to become a parent in these turbulent times. Should we become parents? This timeless question forces us to reckon with who we are and what we love and fear most in ourselves, in our relationships, and in the world as it is now and as it will be. When Gina Rushton admitted she had little time left to make the decision for herself, the magnitude of the choice overwhelmed her. Her search for her own “yes” or “no” only uncovered more questions to be answered. How do we clearly consider creating a new life on a planet facing catastrophic climate change? How do we reassess the gender roles we have been assigned at birth and by society? How do we balance ascending careers with declining fertility? How do we know if we’ve found the right co-parent, or if we want to go it alone, or if we don’t want to do it at all? To seek clarity on these questions, Rushton spoke to

doctors, sociologists, economists, and ethicists, as well as parents and childless people of all ages and from around the world. Here, she explores and presents policies, data, and case studies from people who have made this decision—one way or the other—and shows how the process can be revelatory in discovering who we are as individuals. Drawing on the depth of knowledge afforded by her body of work as an award-winning journalist on the abortion beat, Rushton wrote the book that she needed, and we all need, to stop a panicked internal monologue and start a genuine dialogue about what we want from our lives and why.

**Teaching ‘Proper’ Drinking?** Maggie Brady, 2017-12-12 In *Teaching ‘Proper’ Drinking?*, the author brings together three fields of scholarship: socio-historical studies of alcohol, Australian Indigenous policy history and social enterprise studies. The case studies in the book offer the first detailed surveys of efforts to teach responsible drinking practices to Aboriginal people by installing canteens in remote communities, and of the purchase of public hotels by Indigenous groups in attempts both to control sales of alcohol and to create social enterprises by redistributing profits for the community good. Ethnographies of the hotels are examined through the analytical lens of the Swedish ‘Gothenburg’ system of municipal hotel ownership. The research reveals that the community governance of such social enterprises is not purely a matter of good administration or compliance with the relevant liquor legislation. Their administration is imbued with the additional challenges posed by political contestation, both within and beyond the communities concerned. ‘The idea that community or government ownership and management of a hotel or other drinking place would be a good way to control drinking and limit harm has been commonplace in many Anglophone and Nordic countries, but has been less recognised in Australia. Maggie Brady’s book brings together the hidden history of such ideas and initiatives in Australia ... In an original and wide-ranging set of case studies, Brady shows that success in reducing harm has varied between communities, largely depending on whether motivations to raise revenue or to reduce harm are in control.’ — Professor Robin Room, Director, Centre for Alcohol Policy Research, La Trobe University

**Strengthening Forensic Science in the United States** National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
