Beyond Bach Andrew Talle,2017-04-07 Reverence for J. S. Bach's music and its towering presence in our cultural memory have long affected how people hear his works. In his own time, however, Bach stood as just another figure among a number of composers, many of them more popular with the music-loving public. Eschewing the great composer style of music history, Andrew Talle takes us on a journey that looks at how ordinary people made music in Bach's Germany. Talle focuses in particular on the culture of keyboard playing as lived in public and private. As he ranges through a wealth of documents, instruments, diaries, account ledgers, and works of art, Talle brings a fascinating cast of characters to life. These individuals--amateur and professional performers, patrons, instrument builders, and listeners--inhabited a lost world, and Talle's deft expertise teases out the diverse roles music played in their lives and in their relationships with one another. At the same time, his nuanced re-creation of keyboard playing's social milieu illuminates the era's reception of Bach's immortal works.

Why We Took the Car Wolfgang Herrndorf,2014-02-06 Mike doesn't get why people think he's boring. Sure, he doesn't have many friends. (OK, zero friends.) And everyone laughs at him when he reads his essays out loud in class. And he's never invited to parties. But one day Tschick, the odd new boy at school, shows up at Mike's house out of the blue. He dares him to go on a road trip with him. No parents, no map, no destination. Will they get hopelessly lost in the middle of nowhere? Probably. Will they meet crazy people and get into serious trouble? Definitely. But will they ever be called boring again? Not a chance. Sophist Plato,1993-01-01 A fluent and accurate new translation of the dialogue that, of all Plato's works, has seemed to speak most directly to the interests of contemporary and analytical philosophers. White's extensive introduction explores the dialogue's central themes, its connection with related discussions in other dialogues, and its implication for the interpretation of Plato's metaphysics.

Autonomous Driving Markus Maurer,J Christian Gerdes,Barbara Lenz,2020-10-08 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the

current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of autonomous driving.
