Hacer visible lo cotidiano Miguel Ángel Santos Guerra,1990-08-24 A través de esta obra se pretende acercar al profesor a los presupuestos teóricos y a las estrategias metodológicas que hacen del proceso evaluador una rigurosa investigación, tal y como se expresa en el subtítulo del libro: Teoría y práctica de la evaluación cualitativa de los centros escolares. La finalidad, por tanto, es comprender en profundidad la naturaleza de los discursos, relaciones y prácticas de la escuela, tomar decisiones que la mejoren, alentar y desarrollar la profesionalidad de los docentes y generar teorías que expliquen e interpreten la realidad escolar. Así pues, un libro fundamental para estos tiempos en los que la evaluación del aprendizaje ha pasado a convertirse en un análisis de los procesos más que de los resultados, y en los que la autoevaluación y heteroevaluación van cobrando cada vez más protagonismo.

La negociación, piedra angular Miguel Ángel Santos Guerra,2022-09-29 Este libro nace de dos fuentes igualmente importantes. Por una parte, de las lecturas, la reflexión y el debate con colegas. Por otra, de la experiencia de muchas investigaciones y evaluaciones realizadas a lo largo de casi medio siglo de trabajo. Proviene de la práctica y conduce a la práctica. Se plantea la negociación en investigaciones y en evaluaciones, porque no toda investigación es una evaluación, aunque toda evaluación sea una investigación. Cada una de las modalidades de exploración tiene sus peculiaridades y sus exigencias. Pero en las dos se hace necesaria, a juicio del autor, la presencia de la negociación. Se trata de un manual que explica en qué consiste la negociación, su necesidad e importancia, sus fases (inicial, de proceso, de informes), sus principios, sus mitos y sus errores. Es un libro para saber y también para saber hacer. Especial mención merece el capítulo titulado La flecha ética en el que se defienden los valores democráticos de la evaluación/investigación ante las manipulaciones del poder. Se presentan dos ejemplos (uno en Bolivia, otro en España). También se presentan, de forma somera, varios casos en los que se puede ver el empleo de la negociación. En el último capítulo se presentan doce ejercicios que pretenden servir de ayuda para el entrenamiento en los procesos de evaluación.

Vygotsky and Pedagogy ,

Competence Oriented Teacher Training ,2006-01-01 Internationally leading experts from four continents provide new views and pathways to teacher education and training. How can teachers be effectively and efficiently trained to master the complexity and the process conditions of teaching-learning situations? The chapters as a whole demonstrate that subtle knowledge of the conditions and variables of instructional processes is necessary. They provide new insight into the classroom. But the chapters also stress the necessity of reflection: Teachers have to learn how to judge and justify that knowledge and its use. Reflective behaviour, thus, is seem as the overall goal of teacher education and training The authors are aware that this goal might be classified as “idealistic” and present, therefore, complex examples for successful conducting instructional processes. They open the view on hidden or neglected dimensions of teaching and learning, discuss standards for teacher behaviour, present critical situations together with possible solutions and give hints for the use of technology. Together, these chapters present new perspectives for successful teacher actions and the corresponding preparation for successful instruction.

Centenario Museo Nacional de Bellas Artes (Chile),Patricio Muñoz Zárata,Milan Ivelić,2009 On the occasion of the

celebrations of the bicentennial anniversary of Chile, and the centennial anniversary of the National Museum of Fine Arts, constructed in 1910 as part of the festivities of the Independence centennial, the MNBA planned a series of exhibitions under the title of Centenario. This beautifully edited recompilation volume comprises the history of the museum MNBA with a descriptive and illustrated catalogue of the 250 most important pieces of its patrimonial collection exhibited in the 7 modules that comprised the program Centenario. Milan Ivelic, director of the MNBA explains: The objective of this publication is to articulate and organize the symbolic imaginaries that are part of the holdings of the Collection of Chilean Art of the MNBA. What this publication is proposing is the organization in a transversal way of the art pieces selected, without following a linear chronology, thus constructing, in a certain way, a new museographic script. The art pieces have been divided into 7 modules based on a broad criteria that respond to their approximation in languages, topic similarities and shared strategic processes for their elaboration, conceptualizing theory and analysis of the artistic practices, without omitting their own historical context--P.20. The contents of the catalogue follow the 7 main topic modules of the exhibitions. Major referential work illustrated with full-page color plates.

University and School Collaborations during a Pandemic Fernando M. Reimers, Francisco J. Marmolejo, 2021-10-04 Based on twenty case studies of universities worldwide, and on a survey administered to leaders in 101 universities, this open access book shows that, amidst the significant challenges caused by the COVID-19 pandemic, universities found ways to engage with schools to support them in sustaining educational opportunity. In doing so, they generated considerable innovation, which reinforced the integration of the research and outreach functions of the university. The evidence suggests that universities are indeed open systems, in interaction with their environment, able to discover changes that can influence them and to change in response to those changes. They are also able, in the success of their efforts to mitigate the educational impact of the pandemic, to create better futures, as the result of the innovations they can generate. This challenges the view of universities as “ivory towers” being isolated from the surrounding environment and detached from local problems. As they reached out to schools, universities not only generated clear and valuable innovations to sustain educational opportunity and to improve it, this process also contributed to transform internal university processes in ways that enhanced their own ability to deliver on the third mission of outreach.

The Cambridge Companion to Vygotsky Harry Daniels, Michael Cole, James V. Wertsch, 2007-04-30 L. S. Vygotsky was an early-twentieth-century Russian social theorist whose writing exerts a significant influence on the development of social theory in the early-twenty-first century. His non-deterministic, non-reductionist account of the formation of mind provides current theoretical developments with a broadly drawn yet very powerful sketch of the ways in which humans shape and are

shaped by social, cultural, and historical conditions. This dialectical conception of development insists on the importance of genetic or developmental analysis at several levels. The Cambridge Companion to Vygotsky is a comprehensive text that provides students, academics, and practitioners with a critical perspective on Vygotsky and his work.

Radical Equations Robert Moses, Charles E. Cobb, 2002-02-01 The remarkable story of the Algebra Project, a community-based effort to develop math-science literacy in disadvantaged schools—as told by the program’s founder “Bob Moses was a hero of mine. His quiet confidence helped shape the civil rights movement, and he inspired generations of young people looking to make a difference”—Barack Obama At a time when popular solutions to the educational plight of poor children of color are imposed from the outside—national standards, high-stakes tests, charismatic individual saviors—the acclaimed Algebra Project and its founder, Robert Moses, offer a vision of school reform based in the power of communities. Begun in 1982, the Algebra Project is transforming math education in twenty-five cities. Founded on the belief that math-science literacy is a prerequisite for full citizenship in society, the Project works with entire communities—parents, teachers, and especially students—to create a culture of literacy around algebra, a crucial stepping-stone to college math and opportunity. Telling the story of this remarkable program, Robert Moses draws on lessons from the 1960s Southern voter registration he famously helped organize: “Everyone said sharecroppers didn't want to vote. It wasn't until we got them demanding to vote that we got attention. Today, when kids are falling wholesale through the cracks, people say they don't want to learn. We have to get the kids themselves to demand what everyone says they don't want.” We see the Algebra Project organizing community by community. Older kids serve as coaches for younger students and build a self-sustained tradition of leadership. Teachers use innovative techniques. And we see the remarkable success stories of schools like the predominately poor Hart School in Bessemer, Alabama, which outscored the city's middle-class flagship school in just three years. Radical Equations provides a model for anyone looking for a community-based solution to the problems of our disadvantaged schools.

Teachers as Intellectuals Henry A. Giroux, 2024-12-26 First published in 1988, Teachers as Intellectuals encourages us to see schools as democratic spaces in which teachers and students work together to transform society. Giroux incorporates the most valuable insights of critical pedagogy into a more comprehensive and practical theory of schooling, committed to educating students in the language of critique and possibility. At the heart of his vision for schooling is the ability of the teacher to act as a transformative intellectual and to use critical pedagogy as a form of cultural politics. The book includes an introduction by Paulo Freire, a foreword by Peter McLaren and new introduction from the author.
