Sword of the Rightful King Jane Yolen,2013-05-06 An ALA Best Book for Young Adults. "[A] spellbinding twist on the Round Table legend . . . a standout in this enormous canon."—Publishers Weekly (starred review) The newly crowned King Arthur is unsure of himself; worse, the people are unsure of him. Too many people want the throne, and treachery is everywhere. Merlin must do something before the king is betrayed, or murdered, or—worst of all—gets married. So Merlin magically places a sword into a slab of rock, lets it be known that whosoever removes the blade will rule all of England, and invites any man who would dare to try to pull out the sword. After a bit of showmanship, Arthur will draw the blade (with a little magical help, of course), and the people will rally around the young king. Except someone else pulls the sword out first . . . A Booklist Editors' Choice ABA's Pick of the Lists A Parent's Guide Children's Media Award Winner "Yolen takes elements of Arthurian legend and makes them her own in this involving novel."—Booklist (starred review) "[A] page-turning tale of magic and adventure, betrayal, loyalty, and love."—School Library Journal (starred review) "A subtle, many-layered tale . . . It is, as the book's ending tells readers, 'an old story but a good one,' and Yolen does it honor."—VOYA (5Q—highest rating)

Hudson River School Visions Sanford Robinson Gifford, 2003 Sanford Gifford (American, 1823-1880), a leading Hudson River School landscape painter and a founder of The Metropolitan Museum of Art, was so esteemed by the New York art world that, at his untimely death, the Museum mounted a show of his work-the first monographic exhibition accorded any artist-and published a Memorial Catalogue that, for nearly a century, remained the principal source on his oeuvre. Gifford's art, which was inspired by the work of Thomas Cole, the founder of the Hudson River School, and by that of British artist J.M.W. Turner, and enriched by his travels in Europe (from 1855 to 1857, and from 1868 to 1869), came to be called air painting, for he made the ambient light of each scene-color saturated and atmospherically potent-the key to its expression. His approach to painting and his unique style gave rise to a highly distinctive body of work with enchanting and mesmerizing effect. This publication examines seventy paintings by the artist and includes comparative illustrations of related works by Gifford, his Hudson River School mentors and colleagues, and those painters, in addition to Cole and Turner, who exerted influence on his art, including Frederic Edwin Church and John F. Kensett. The essays discuss Gifford's place in the Hudson River School, his numerous Catskill Mountain subjects, his experiences and perceptions as a traveler both at home and abroad, and the variety of his patrons. -- Metropolitan Museum of Art website.

In Defense of a Liberal Education Fareed Zakaria, 2015-03-30 CNN host and best-selling author Fareed Zakaria argues for a renewed commitment to the world's most valuable educational tradition. The liberal arts are under attack. The

governors of Florida, Texas, and North Carolina have all pledged that they will not spend taxpayer money subsidizing the liberal arts, and they seem to have an unlikely ally in President Obama. While at a General Electric plant in early 2014, Obama remarked, I promise you, folks can make a lot more, potentially, with skilled manufacturing or the trades than they might with an art history degree. These messages are hitting home: majors like English and history, once very popular and highly respected, are in steep decline. I get it, writes Fareed Zakaria, recalling the atmosphere in India where he grew up, which was even more obsessed with getting a skills-based education. However, the CNN host and best-selling author explains why this widely held view is mistaken and shortsighted. Zakaria eloquently expounds on the virtues of a liberal arts education—how to write clearly, how to express yourself convincingly, and how to think analytically. He turns our leaders' vocational argument on its head. American routine manufacturing jobs continue to get automated or outsourced, and specific vocational knowledge is often outdated within a few years. Engineering is a great profession, but key value-added skills you will also need are creativity, lateral thinking, design, communication, storytelling, and, more than anything, the ability to continually learn and enjoy learning—precisely the gifts of a liberal education. Zakaria argues that technology is transforming education, opening up access to the best courses and classes in a vast variety of subjects for millions around the world. We are at the dawn of the greatest expansion of the idea of a liberal education in human history.

The Noisy Renaissance Niall Atkinson, 2016-09-16 From the strictly regimented church bells to the freewheeling chatter of civic life, Renaissance Florence was a city built not just of stone but of sound as well. An evocative alternative to the dominant visual understanding of urban spaces, *The Noisy Renaissance* examines the premodern city as an acoustic phenomenon in which citizens used sound to navigate space and society. Analyzing a range of documentary and literary evidence, art and architectural historian Niall Atkinson creates an “acoustic topography” of Florence. The dissemination of official messages, the rhythm of prayer, and the murmur of rumor and gossip combined to form a soundscape that became a foundation in the creation and maintenance of the urban community just as much as the city’s physical buildings. Sound in this space triggered a wide variety of social behaviors and spatial relations: hierarchical, personal, communal, political, domestic, sexual, spiritual, and religious. By exploring these rarely studied soundscapes, Atkinson shows Florence to be both an exceptional and an exemplary case study of urban conditions in the early modern period.
